

Matej Majeric, PhD, formerly a member of the national alpine skiing team in the former Yugoslavia. Today, he is teacher at the University of Ljubljana, Faculty of Sports. He teaches several subjects: Basics of Movement in Sports, Fitness, Healthy Lifestyle, Alpine Skiing and Snowboarding, Water Activities and Windsurfing. He also lectures at the trainings of sports federations.

He is actively publishing research and professional articles. He is currently on the list of 16,309 researchers of the Research Agency of the Republic of Slovenia for the field of Education (Social Sciences) ranked 57th. His innovative doctoral thesis Analysis of models of assessment of sports knowledge for teachers still represents an important work for reliable, objective, as well as fair assessment of students in physical education. He successfully managed the Center for Lifelong Learning of the Faculty of Sports.
